PROPOSAL

THE SUMMER GAMES 1980

It is unfortunate that the athletes of the United States will not be able to participate in the 1980 Summer Olympics because of the Soviet invasion of Afghanistan and the resulting boycott called for by President Carter. Boston believes that an international competition should be held in the United States which is as close as possible to the Olympic games as they would have been held but for the soviet invasion of Afghanistan.

One City

Boston hopes that the United States Olympic Committee will sponsor an international invitational competition with all of the spirit, pageantry and excitement of a major sports festival. We believe that that result can be best achieved by having the competition in one principal location. Boston is a substantial international city (2.5 million in greater Boston) with excellent public transportation, medical resources, public amenities, university competition sites and housing, media conveniences and urban structures to support such a festival including a wealth of school buses for shuttle service. The City of Boston is proud to offer itself as the host city for such world games.

Facilities

We have reviewed the requirements of each Olympic event and have concluded that, with the exception of some cycling and diving events, all of the competitions can be held in the immediate Boston area (with only slight modification of some existing facilities), principally because of our unequalled complex of colleges and universities; a full inventory of competition sites and a partial inventory of housing is included in this proposal. Most of the proposed competition sites are within walking distance of downtown Boston and all of the proposed sites are accessible to downtown Boston by public transportation, the farthest from the city being approximately twelve miles. The seaside summer weather in Boston would be most congenial for athletic events. The Hatch Memorial Shell on the Charles River Esplanade would be a magnificent setting for festival ceremonies. During the summer there are more than 20,000 rooms and dining facilities available at our area colleges and universities which could be used for athletes and others associated with the games.

And since this year is Boston's 350th anniversary, many events are already planned which would enhance the festival nature of summer games to be held in Boston.

Timing

Taking into account that the U.S. political conventions will be held July 14 to 18 and August 11 to 15 and the Moscow Olympics are scheduled for July 19 to August 3, international games would most likely have to be held during the period August 4 to August 12 or August 16 to August 29, National games could be accommodated during the Moscow Olympics period. The earlier period would be somewhat preferable for Boston because of the full availability of collegiate housing. The last few days in August are not as available because students will be returning to the colleges and universities in increasing numbers for Fall sessions during that time. However, because several competitive sites would be utilized for the proposed Boston festival, we believe it possible to hold the games within approximately a nine-day period. Greater athlete participation probably could be expected during a time period which does not immediately follow the Moscow Olympics. The following two time periods appear to be best from Boston's point of view:

August 17 to 25
August 4 to 12

New Games for Women

Since there probably would be some flexibility in determining what events might be included in such world games, the Committee is recommending the consideration of additional events for women. In particular, we are suggesting that a women's marathon, women's track events longer than 1500 meters and women's field hockey might well be added to the usual Olympic list of events. Also, because of the availability of numerous squash courts in the Boston area, competition for these events could possibly be included for men and women.

Funding

Boston proposes no large scale construction for the games, so the costs and expenses involved in running international games utilizing existing facilities should be well within revenues which could be expected from the sale of TV rights, gate receipts and corporate contributions and other income usual to a major national or international sports festival. No costs are expected to be borne by the City of Boston or the Commonwealth of Massachusetts. Some financial assistance from the federal government might be required in the early stages of planning and implementation of the program for the games, but any such assistance might be recoverable from expected revenues.

Public Support

Since the possibility of Boston's expressing its interest in hosting summer athletic games has become known, overwhelming public support has developed. The Governor of the Commonwealth, Edward J. King, has pledged the help of his administration and Secretary of Transportation and Construction Barry Locke and Commissioner of Commerce and Development James Carlin are now working on this project. The Greater Boston College Athletic Directors representing all the major colleges and universities in the area are in enthusiastic support, as are their presidents.

Decision

Boston is aware that various options are being explored for holding summer world and/or national games. We understand that serious consideration is being given to holding events of international games in several locations simultaneously both inside and outside the United States and holding events of national games in several American cities. Boston would be pleased to participate in any such dispersed games and to work towards making them a success. However, at this time, Boston, believing that a one-city sports festival would be most dramatic and satisfying for athletes and the public alike, is presenting a concrete proposal so that those who must make the decision will have a choice of this kind before them.

We will be developing additional materials to demonstrate Boston's capabilities and are ready to meet with the U.S. Olympic Committee and its staff and concerned sports federations to elaborate on this proposal and to respond to questions.

Mayor's Committee for the Summer Games 1980

FRANCIS X. MEANEY, CHAIRMAN

Boston

March 7, 1980

Jimmy Carter
President,
United States of America
White House

Dear Mr. President:

Boston stands ready to host select events as part of the alternative Olympiad you have proposed.

I am today officially extending this City's invitation to prepare a modified Olympic village for athletes from the U.S. and other countries supporting the boycott of the Moscow games.

Within 10 miles of the City proper there are more than 30,000 hotel and dormitory rooms and 50 collegiate and professional competition sites all served by public transportation.

In the past four years, Boston has conducted its own Bicentennial celebration, and hosted visits by Queen Elizabeth II and Pope John Paul II.

The City is now preparing for its 350th anniversary, involving comprehensive planning that will require only expanded scope to accomodate the games.

Boston will open its doors - and Bostonians will open their hearts - to people of all countries attending.

There is no site anywhere in the world more suited to stage games designed to protest Soviet disregard for individual rights than Boston, the birthplace of the American revolution.

In the spirit of cooperation with and support of the Olympic boycott, I offer Boston's unique heritage and contemporary capability as an ideal site to host a reduced-scale Olympiad.

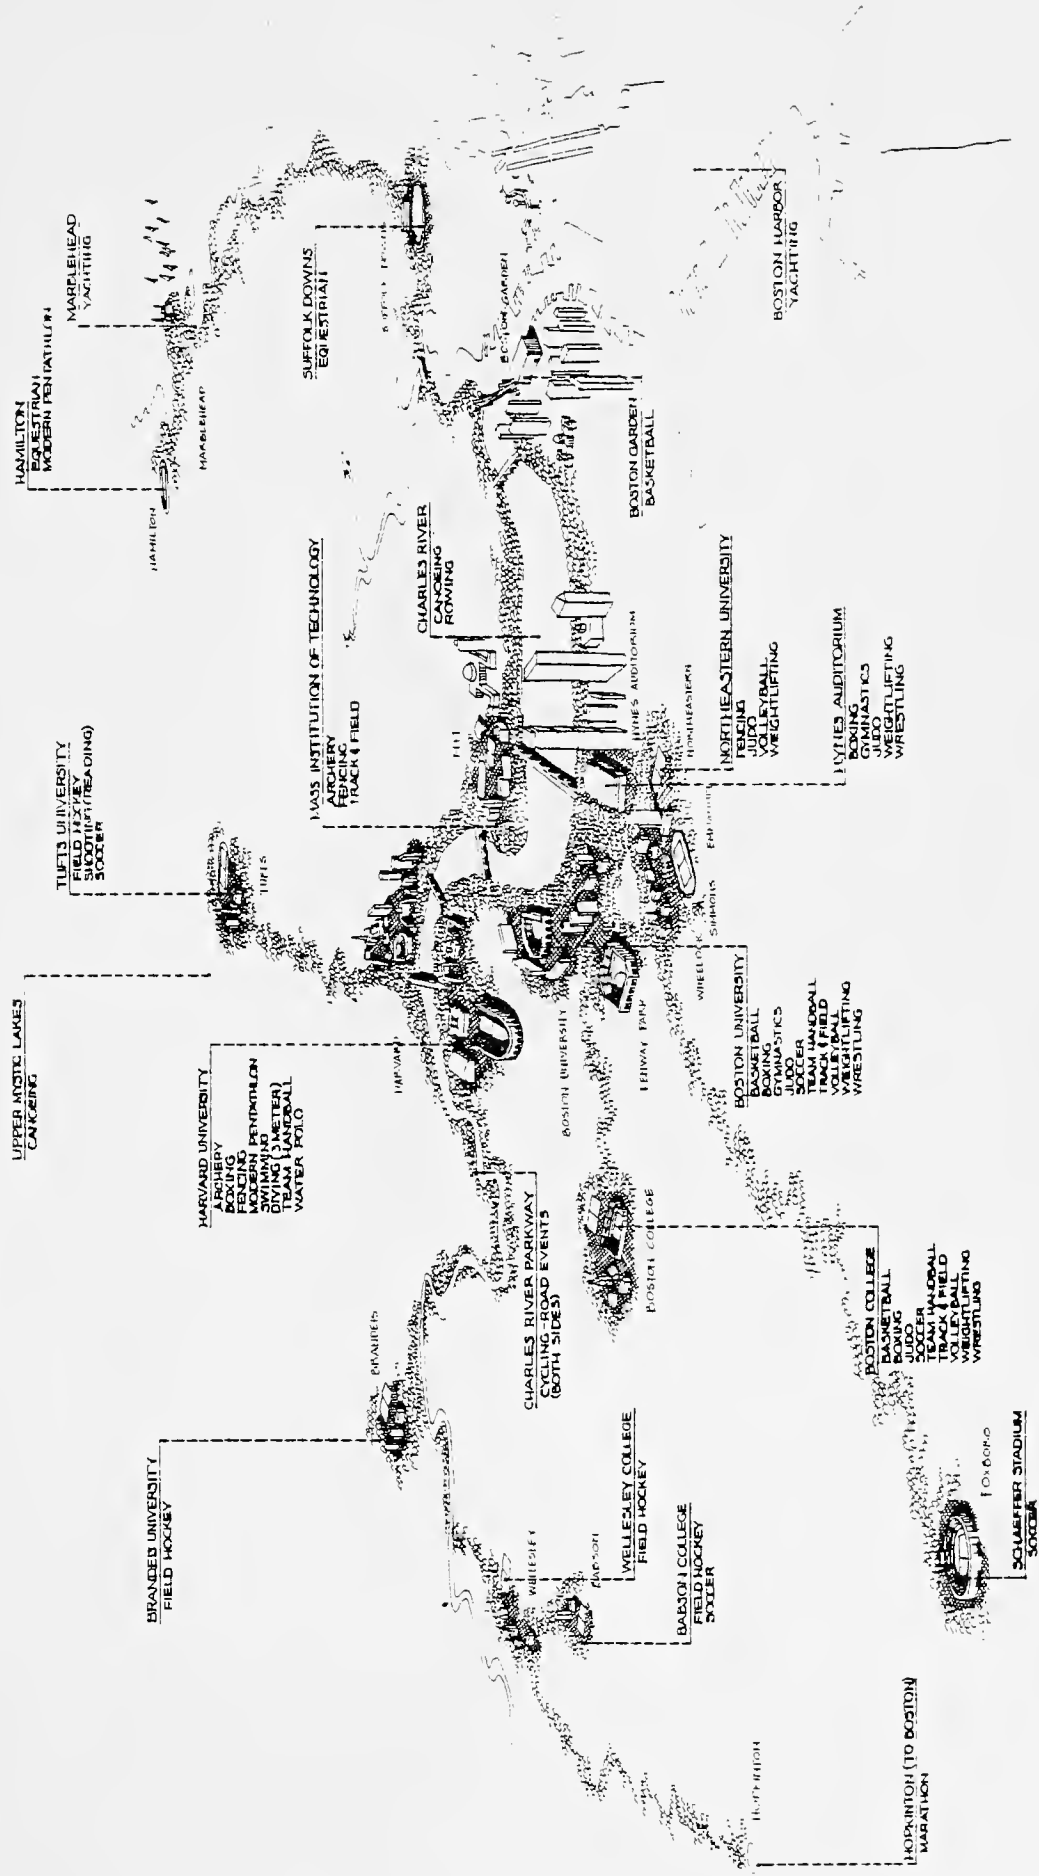

Sincerely,

Kevin H. White
Mayor of Boston

BOSTON SUMMER GAMES 1980
